Re: AgroDiamonds

Dear Don:

I just wanted to let you know how happy we are with the AgroDiamonds product. As you are well aware, we have been using your product in our commercial and residential landscape projects for years. In addition to reducing irrigation requirements, AgroDiamonds has proven especially helpful in improving our projects plant survival rates. As you probably know, many of our projects are on Jupiter Island and other harsh growing environments in this area where the soil is mostly sand. This has been another bad year for drought and as usual we have been incorporating AgroDiamonds into our tree, sod and smaller plant material plantings. The results have been phenomenal, especially in sandy soil. I have done entire lawns with AgroDiamonds, and they are some of the most beautiful lawns around.

Using the AgroDiamonds enables us to put the customer's mind at ease about the sustainability of their new landscaping, even when water restrictions are very tight. That means that people are more likely to go ahead with their new plantings instead of holding off. For us as landscapers, we know that when we install landscaping with AgroDiamonds, we are in a much better position to stand behind our guarantee. It gives *us* confidence, too.

We are very grateful to have a product like this available and want to thank you for introducing it to us. We are hearing from the water management officials that water restrictions are going to be put in place permanently, instead of just occasionally. So the need for AgroDiamonds will be even greater if that happens.

Please do not hesitate to contact me at 561-718-1500, if you have any questions or comments. Thank you!

Sincerely yours,

Bruce C. Armstrong, President
